Skills

Languages: C++, JavaScript, TypeScript, SQL

Technologies & Tools: Next.js, React, Redux, React Router, TailwindCss, Astro, React Query, Express, Nestjs, MongoDB, Redis, JWT, Git, Github, Vim

Work Experience

AST Consulting, Remote

Feb 2024 - Aug 2024

FullStack Developer Intern

- Developed and maintained Healthtrip.com using Next.js, achieving all core web vitals for optimal performance, resulting in a seamless user experience for over 59,000 patients across 38+ countries.
- Implemented internationalization and RTL support in Healthtrip.com using Next.js, facilitating multilingual and bidirectional text for a global user base.
- Worked on an e-waste management platform using React and Material-UI (MUI), ensuring a responsive and user-friendly interface for efficient e-waste tracking and management.
- Next.js, React, Redux, React Router, TailwindCss, Shadcn, Nestjs, MongoDB

BiiSii Venture, Naigaon

Jan 2024

Website Developer (Contract)

- Developed a comprehensive website for BiiSii Venture, a wealth management company, achieving all core web vitals for optimal performance and user experience.
- Integrated Nodemailer for email communication, enabling efficient email interactions between clients and company personnel through a Hostinger email server, which I set up.
- Deployed the website using Hostinger's VPS, added SSL certificates, and successfully indexed the site on Google Search via Google Search Console, enhancing security and online visibility.
- React, Redux, React Router, TailwindCss, Nodemailer, Express, MongoDB

Education

Shree L R Tiwari College Of Engineering | Mira Road

Feb 2020 - May 2024

B.E. in Information Technology

CGPA: 8.25

Project Work

Devoverflow - a Q&A platform (May 2024 - June 2024): Developed with Next.js 14, TypeScript, and Tailwind CSS. Features include question management, upvoting/downvoting, code snippets, search/filter, user profiles, badges, job search, and light/dark mode. Utilized MongoDB, Mongoose, Clerk, Shadcn UI, PrismJS, Zod, TinyMCE, JSearch API, and deployed on Vercel.

[Live Site](#) [GitHub](#)

Buzz - a social media app (Dec 2023 - Jan 2024): Developed a social media app with the power of React and TypeScript. Easily create and explore posts, and enjoy a strong authentication system implemented using JWT. Quick data fetching and caching using Tanstack-Query(React-Query).

[Live Site](#) [GitHub](#)

YumYum - a food ordering Web Application (May 2023 - June 2023): Developed a ReactJS food ordering app. It uses a custom express server to serve data to the client app and a Stripe payment gateway for payments. It uses React Router Dom for routing and Tailwind CSS for styling. Implemented custom hooks for fetching data and a shimmer UI made from scratch. Lazy loading and code splitting for better performance.
